

INUA TOTO FOUNDATION

PROJECT FUNDING PROPOSAL

Child, Family and Community Support Programme

Project Period: 2026–2027

Target Area: Kenya

Target Beneficiaries: Vulnerable children, families, schools and disadvantaged communities

Implementing Organization: Inua Toto Foundation

Lifting Children • Strengthening Families • Building Communities

1. Executive Summary

Inua Toto Foundation is seeking financial and material support to implement a structured Child, Family and Community Support Programme designed to improve the wellbeing, dignity and opportunities of vulnerable children and families in Kenya.

The programme responds to practical challenges affecting disadvantaged households, including inadequate housing, limited access to education, food insecurity, insufficient water and sanitation, lack of essential household items, and barriers to menstrual hygiene for girls.

The Foundation proposes a flexible donor partnership model through which individuals, institutions, companies, churches, foundations and other development partners can support specific children, families, schools or programme activities. Contributions will be directed toward identified needs and managed with appropriate accountability and safeguarding measures.

2. Organizational Background

Inua Toto Foundation is committed to supporting vulnerable children and families and creating opportunities that enable children to grow in safe, healthy and supportive environments.

The Foundation recognizes that poverty affects children across multiple dimensions. Lack of safe shelter, school materials, food, clean water, hygiene products and other basic necessities can undermine school attendance, health, protection and long-term development.

This proposal therefore adopts a holistic approach that combines immediate humanitarian assistance with education, child wellbeing, dignity and community development.

3. Problem Statement

Vulnerable children and families in Kenya continue to experience interconnected social and economic challenges. Households with limited income may struggle to provide safe shelter, adequate food, school requirements, clean water, sanitation and essential hygiene products.

For girls, lack of menstrual hygiene supplies can create an additional barrier to regular school attendance and participation. Children living in difficult circumstances may also have limited opportunities for safe recreation and positive development.

There is therefore a need for targeted, transparent and sustainable support that addresses immediate needs while strengthening children's ability to remain in school and families' ability to live with dignity.

4. Overall Goal

To improve the quality of life, protection, education and development opportunities of vulnerable children and families through targeted humanitarian assistance and community-based support.

5. Specific Objectives

1. Provide safe and improved housing and essential household support to selected vulnerable families.
2. Increase access to education and reduce the risk of school dropout among vulnerable children.
3. Improve access to clean water, sanitation and hygiene resources.
4. Support girls with menstrual hygiene materials and age-appropriate health education.
5. Promote children's physical, social and emotional wellbeing through sport and recreation.

6. Provide targeted emergency and general humanitarian assistance to households experiencing severe hardship.
7. Mobilize responsible donor partnerships to expand the reach and sustainability of the programme.

6. Programme Components

A. Housing and Family Welfare

Support may include construction or improvement of basic homes, concrete floors, sanitation facilities, beds, mattresses, blankets, kitchen utensils, tables, storage facilities and water tanks.

B. Education Support

Support may cover school fees, uniforms, books, stationery, examination-related costs and other essential educational requirements at primary, secondary and post-secondary levels.

C. Water, Sanitation and Hygiene

The programme will support household and community water storage, sanitation improvements and hygiene education, with priority given to households and schools with significant needs.

D. Girls' Dignity Programme

The programme will provide reusable sanitary pads and related hygiene materials, together with menstrual-health education and practical guidance for girls and caregivers.

E. Sports and Child Development

The Foundation will support schools and children's programmes with footballs, volleyballs, nets, playground equipment and other appropriate recreational resources.

F. Emergency and General Humanitarian Assistance

Flexible contributions will enable the Foundation to respond to urgent needs identified through beneficiary assessments.

7. Target Beneficiaries

Priority will be given to:

- Orphans and vulnerable children.
- Children from households experiencing severe financial hardship.
- Children at risk of dropping out of school.
- Vulnerable girls and adolescents.
- Single-parent households facing significant economic challenges.
- Families living in inadequate or unsafe housing.
- Vulnerable schools and community groups.
- Children with limited access to basic necessities.

8. Proposed Sponsorship and Giving Levels

Donors may support a specific need, child, family, school or programme. The following indicative giving levels provide a practical framework for fundraising and donor engagement.

9. Implementation Approach

Implementation will be guided by needs assessment, beneficiary identification, donor coordination, procurement or direct provision of approved support, monitoring, documentation and reporting.

The Foundation will seek to prioritize beneficiaries transparently and will maintain appropriate records of assistance provided. Child safeguarding, confidentiality and responsible use of beneficiary information will be observed throughout implementation.

10. Monitoring, Evaluation and Accountability

The Foundation will monitor programme activities against agreed objectives and maintain records of funds received, beneficiaries supported, goods or services provided and project outputs.

Where appropriate and subject to safeguarding and privacy requirements, donors and partners may receive narrative updates, financial summaries, photographs or beneficiary stories demonstrating programme impact.

11. Sustainability

The programme will pursue partnerships that combine immediate assistance with longer-term improvements in education, household resilience, water access, hygiene and child development.

The Foundation will also encourage local participation, institutional partnerships and diversified fundraising so that support for vulnerable children is not dependent on a single donor or funding source.

12. Donor Partnership Opportunity

Inua Toto Foundation invites individuals, corporate organizations, foundations, churches, NGOs, schools, universities, development partners and well-wishers to partner with the Foundation.

Partners may choose to sponsor an individual child, family, school activity, Girls' Dignity initiative, housing intervention, education programme or general humanitarian fund. Customized partnership packages can be developed according to donor priorities and available resources.

13. Conclusion

Every child deserves an opportunity to grow, learn and live with dignity. Inua Toto Foundation believes that practical support, delivered transparently and in partnership with communities, can make a meaningful and lasting difference.

We respectfully invite development partners and well-wishers to support this programme and join Inua Toto Foundation in lifting children, strengthening families and building resilient communities in Kenya.

Indicative Giving Schedule

Support Area	Indicative Contribution	Purpose
Family Home Kit	\$40	Basic kitchen utensils and essential household items
Basic Household / Hygiene Support	\$50	Essential household or hygiene supplies
Sports Support	\$75	Football, volleyball or related school sports equipment
Primary School Support	\$100	Contribution toward one child's annual educational needs
Child Sleeping Support	\$120	Bunk bed, mattress and blanket
2,000-Litre Water Tank	\$150	Household water storage for a family
2,500-Litre Water Tank	\$175	Larger household water storage

Secondary School Sponsorship	\$500	Contribution toward one student's annual educational costs
School Sports / Play Project	\$500	Playground or sports equipment
College Sponsorship	\$750	Contribution toward one student's annual educational costs
Basic Family Shelter	\$1,000	Contribution toward construction of a basic home
Complete Housing Package	\$1,500	Basic house with essential furnishings and household facilities
Girls' Dignity Programme	Any amount	Reusable sanitary pads, hygiene materials and education

14. Indicative Results Framework

Component	Expected Result	Illustrative Indicator
Housing & Family Welfare	Vulnerable households receive improved shelter and essential items	Number of households supported
Education	Children remain in or return to school	Number of children receiving education support
Water & Sanitation	Improved household access to water storage and sanitation	Number of tanks/facilities provided
Girls' Dignity	Girls have improved access to menstrual hygiene support	Number of girls reached
Sports & Recreation	Children gain access to safe recreational activities	Schools/programmes receiving equipment
Humanitarian Assistance	Urgent household needs are addressed	Number of households receiving emergency support
